Videos: sustainable mobilities in peri-urban areas?

Chapô

This Meeting sought to question the image of peri-urban areas as unlivable unbearable and without qualities or urbanness. Researchers, professionals and artists defended their views of the different lifestyles these areas give birth to and potential they offer in terms of sustainable mobility. The audience was invited to actively participate in the discussion.

You can now watch (again) the two days of the Meetings – or thirty videos displaying the speeches, discussions and debates which occurred between practitioners, researchers and artists from the entire world, questioning the conventional wisdom about peri-urban areas.
