1. Authors

Dominik Wiedenhofer

Social-Ecologist

Dominik Wiedenhofer is a senior scientist at the University of Natural Resources and Life Sciences, Vienna. Dominik's research builds on a socio-ecological systems perspective towards understanding the potentials and barriers for a sustainability transformation. In his work on sustainable consumption he is linking resource use and emissions across international supply chains to the consumption of households, to understand the environmental implications of affluence and inequality and to identify drivers and pathways towards a carbon-free everyday life. https://boku.ac.at/wiso/sec
