Master 2 Aménagement du Territoire et Urbanisme Université Paris 1 2020-2021

The research is being conducted by a group of students from the Master 2 in Urban Planning and Development at the University of Paris 1, under the direction of Juliette Maulat. The group consists of five students: Julie Akl, Léa Delaporte, Pierre-Emmanuel Cance, Damien Harduin and Ségolène Lairé. As part of their master's thesis, they worked on various topics: the mobility of precarious workers, women's sporting practices, citizen participation in eco-neighborhood projects, running practices in the city, emergency accommodation and access to water in the squats and slums of Bordeaux. The group can therefore draw upon varied experiences and knowledge in different fields connected to research on bicycle delivery riders: mobile workers, precariousness, the experience of mobility in urban areas, sporting practices, the situation of migrants in France, etc.
