We are delighted to share that on 10th March we will be hosting an exciting online webinar featuring Dr Stephanie Sodero talking about her new book 'Under the Weather: Reimagining Mobility in the Climate Crisis'. The webinar will also feature two discussants Dr Mimi Sheller and Dr Monika Buscher.

In her book, Stephanie uses two Atlantic Canadian case studies as a springboard, and contributes to pressing cultural and policy discussions about community resilience by imagining human mobility that works with, rather than against, the climate in ways that benefit local communities. Focusing on community advocates, policy makers, and academics, Stephanie calls for a transformative approach to mobility and offer five recommendations: revolutionising mobility, prioritizing vital mobilities, embracing green and blue, rebranding redundancy, and thinking flex.

To register for the event please follow this link to the Eventbrite.

Mobility

For the Mobile Lives Forum, mobility is understood as the process of how individuals travel across distances in order to deploy through time and space the activities that make up their lifestyles. These travel practices are embedded in socio-technical systems, produced by transport and communication industries and techniques, and by normative discourses on these practices, with considerable social, environmental and spatial impacts.
