Benjamin Bayart

Ingénieur-e

Benjamin Bayart is an IT engineer and for 15 years was president of the French Data Network, the country's longest-standing supplier of internet access. He defends the right to freedom of expression and is a supporter of the web's neutrality and its free software. He has also delivered conference papers on subjects such as "Internet freedom or Minitel 2.0?" and "FTTH – Fiber To The Home and regional development."
