Mobility Eco Forum (MEF) aims to make public and reflect about environmental sustainable mobility and mobility justice. Furthermore, the MEF is an international conference to scale-up and disseminate good practices and successful initiatives in the field of sustainable urban mobility in large and medium European and Mediterranean cities. This year European Mobility Week focuses on the role of technologies and sharing mobilities. MEF wants to re-direct these topics into the future scenarios for mobile lives in cities.

MEF is part of Global Eco Forum, a project developed by eco-union, with the objective of divulge visions about the socio-ecological transition of the Euro-Mediterranean Region.
